Standby Circuits

1. Service Description

A Standby Circuit is an interconnecting circuit with line or trunk side access which has been activated but rendered incapable, by SaskTel, of carrying traffic.

2. Conditions of Service

1. All requests to establish standby circuits and to subsequently remove the standby condition must be addressed to SaskTel's Carrier Services Group.

2. Upon removal of the standby condition, standby circuits may be used only for the type of service specified in the original order which established them (Eg: PSTN connectivity, Toll-Free connection, and Feature Group D).

3. Rates

1. SaskTel will furnish standby circuits at the rates and charges referenced in 1 E of the Interconnecting Circuits with Trunk Side Access tariff and in the appropriate General Tariff services that may be used to provide interconnecting circuits with line side access.

2. The only service charge associated with the establishment of a standby circuit, is the one to activate the appropriate connection or access as follows:
   (a) For interconnecting circuits with line side access:
       The services charges for PSTN connectivity found in the Digital Exchange Access tariff and toll service connections apply, as appropriate.   C
   (b) For interconnecting circuits with trunk side access, the service charge is that specified for an Inward Order in 1F of the Interconnecting Circuits with Trunk Side Access tariff.

      3. Rates – *Continued*   F

        3. Designation of an active circuit to standby and removal of the standby condition are each subject to the appropriate charges as follows:

           (a) For interconnecting circuits with line side access:
               A minimum service charge of $45.00 per customer order (request) plus a service charge per circuit equal to the service charge to establish the interconnecting circuit.

           (b) For interconnecting circuits with trunk side access:
               Change Order charge as specified in number 1F of the Interconnecting Circuits with Trunk Side Access tariff.
