

ITEM 92 Attachment of Customer-Provided Equipment

1. Subject to #3, a customer may attach the following to SaskTel's telecommunication network:
 - (a) terminal equipment that Industry Canada has approved under the Terminal Attachment Programme and that the Canadian Standards Association has certified and labeled; C
 - (b) terminal equipment installation wiring that Industry Canada has approved under the Terminal Attachment Programme and that the Canadian Standards Association has certified and labeled. C
 - (i) Where a customer connects an attachment to or uses an attachment in conjunction with a SaskTel network service, the customer is required to provide and is responsible for any riser cable and inside wire.
2. Subject to #2(a) and #3, where it is necessary to connect an attachment to SaskTel's facilities in an emergency situation in which there is a danger or hazard to life, that attachment may be made to SaskTel's facilities for the sole purpose and restricted use of a special communication required to resolve the emergency situation, and that attachment must be disconnected immediately after such use.
 - (a) In no event may any attachments, including without limitation, mobile telephones or systems, be attached to or connected in any way to SaskTel's facilities and equipment used to provide a customer with Fire Alarm Service. In the event of such an unauthorized attachment or connection, SaskTel will not be liable to any party or person including a Fire Alarm Service customer, for any claim for loss or damage of any kind or nature whatsoever, whether to persons or property, whether such losses are direct, indirect, incidental or consequential and whether or not any such claim was reasonably foreseeable by SaskTel.

3. Any attachment described in #1 or #2 is required
 - (a) to be designed, operated, used, and maintained in a manner that it does not:
 - (i) damage, interfere with, create a hazard to, or impair the functioning of SaskTel's service, equipment, or channels; *or*
 - (ii) create a hazard or danger to the users of SaskTel's service, equipment, or channels, to SaskTel's employees, customers, or the public; *and*
 - (b) to be connected only at the point of connection designated by SaskTel as set out in the *Policy for Connecting Customer Provided Equipment to SaskTel's Network*.
4. No attachment described in #1:
 - (a) Shall be used for the purpose of, or in any manner that accommodates the connection of SaskTel telecommunication lines and services with the telecommunication facilities or services of another carrier, system, or person, unless as authorized in writing by the manager of SaskTel's Carrier Services group; *or*
 - (b) Shall be mounted or installed inside SaskTel equipment cabinets or housings.

5. SaskTel does not guarantee or represent that its telecommunication lines and system are or will remain compatible with any attachment, and SaskTel has the right to modify, substitute, and change its telecommunication lines and system at any time.
6. When a customer reports trouble on a telecommunication line to which an attachment is connected and a subsequent field visit establishes that the trouble is in the attachment, a charge will be assessed by SaskTel for the time expended by SaskTel (portal to portal) based on the rates set forth in this General Tariff.
7. Requests for repair or maintenance of attachments not under maintenance contract with SaskTel will be entertained by SaskTel subject to the availability of staff, and charges will be based on rates set forth in this General Tariff.
8. SaskTel may disconnect and prohibit the use of any attachment that fails to function in accordance with acceptable standards or terms, and conditions, or that is not entirely compatible with the use and operation of SaskTel's telecommunication lines and the regulations, procedures, standards, terms, and conditions associated with them.
9. All attachments described in this item must comply with standards, terms and conditions prescribed or adopted by SaskTel as set out in the *Policy for Connecting Customer Provided Equipment to SaskTel's Network* and as amended from time to time. C
C
10. All other provisions of this General Tariff exclusive of SaskTel's Terms of Service apply to all attachments, except to the extent of any inconsistency between such other provisions of this General Tariff and SaskTel's Terms of Service.
11. An attachment that is authorized to be connected to or used in conjunction with a telecommunication line of SaskTel, pursuant to an agreement entered into by SaskTel, is permitted, subject to the standards, terms and conditions of the agreement, any regulations, and any provisions of this General Tariff may apply to the agreement.
