Local Interconnection Regions

N

1. Service Description

There are eight Local Interconnection Regions (LIR) as designated by the CRTC. The table below shows each LIR and their respective base rate areas, and the default point of interconnection.

Note: This Tariff is to be used in reference with Competitor Access Tariff ‘Local Network Interconnection and Component Unbundling’.

2. Definitions

“*Local Interconnection Regions (LIR)*” - is a geographical area specified by SaskTel within which traffic is exchanged with CLECs on a Bill and Keep basis. Refer to Competitor Access Tariff Local Interconnection Regions.

“*Point of Interconnection (POI)*” - refers to a single location within an LIR where a CLEC can interconnect with SaskTel for the purpose of exchanging Bill & Keep traffic.

“*Signaling Point of Interconnection (SPOI)*” - allows connection to the STP Gateway within Saskatchewan. It is dependent upon the network architecture of each competitor request.

3. Exchanges

Default POI	LIR designation	Exchange
