

ITEM 80 Resale and Sharing**ITEM 80.1 Definitions**

For the purposes of this Tariff Item:

“*Affiliate*” refers to any person who is not a Canadian Carrier, and who controls or is controlled by the Company or who is controlled by the same person who controls the Company. Control means control in any manner that results in control in fact, whether directly through the ownership of securities or indirectly through a trust, agreement or arrangement, the ownership of any body corporate or otherwise.

D

“*Interconnecting Circuit*” refers to a circuit or path that connects a facility of a reseller or sharing group to a facility of SaskTel to provide access to SaskTel's public switched telephone network (PSTN). An interconnecting circuit may connect:

- (1) a facility of a reseller or a sharing group to a SaskTel central office to which subscriber lines are directly connected (end office); or
- (2) a SaskTel central office to a reseller's Centrex service via a Direct Inward System Access (DISA) path; or

ITEM 80 Resale and Sharing - Continued**ITEM 80.1 Definitions – Continued**

- (3) a reseller's Centrex service to the PSTN via an outgoing Centrex PSTN connection; or
- (4) a facility of a reseller to the SaskTel central office to which end offices are directly connected in order to originate or terminate toll traffic (toll office); or
- (5) a reseller's or sharing group's Centrex service to another switch of the same or of a different reseller or sharing group, where the locals of the Centrex service are configured to redirect to that circuit traffic received from the PSTN.

"Interconnecting Circuit with Line Side Access" refers to any connecting arrangement provided by SaskTel to a reseller over which PSTN dial tone is delivered or access to SaskTel's Toll-free Service is provided to the reseller, enabling it to access or egress SaskTel's public switched network.

"Interconnecting Circuit with Trunk Side Access" refers to a connecting arrangement provided by SaskTel to a reseller, between their respective switches, over which 1+950, 1+ or 101XXXX routing information is exchanged for the purpose of routing traffic to and from the reseller's network.

"Internet Traffic Management Practices" (ITMPs) are defined as measures that may be used by Internet Service Providers (ISP) to manage Internet traffic through economic or technical means.

"Local VoIP services" shall mean voice communication services using Internet Protocol that use telephone numbers which conform to the North American Numbering Plan; and provide subscribers with universal access to and/or from the Public Switched Telephone Network, along with the ability to make and/or receive calls that originate and terminate within an exchange or local calling area as defined in SaskTel's tariffs.

"Related Persons": A person is "related" to another if (1) either holds, either directly or indirectly, at least a 20% interest in, any of the capital, assets, property, profits, earnings, revenues or royalties of the other, or (2) any third party holds, directly or indirectly, at least a 20% interest in, or any options to acquire at least a 20% interest in, any of the capital, assets property, profits, earnings, revenues or royalties of each of the persons.

ITEM 80 Resale and Sharing - Continued**ITEM 80.1 Definitions – Continued**

“*Resale*” refers to the subsequent sale or lease on a commercial basis, with or without adding value, of telecommunications services leased from SaskTel;

“*Reseller*” refers to a person engaged in resale; - for the purposes of this definition:

For greater certainty, a customer is deemed not to act as a reseller or as a sharing group if the telecommunications services that he purchases from SaskTel are used only by a company and one or more related persons; a company and its franchises or authorized franchisees; or a co-operative organization and its associated member companies.

For greater certainty, a government is deemed not to act as a reseller or as a sharing group if the telecommunications services that it purchases are used only by departments, agencies, crown corporations or other entities:

- a. declared by statute to be part of the government in question; or
- b. with respect to the employees of which the government has the obligation as employer.

“*Sharing*” refers to the use by two or more persons, in an arrangement not involving resale, of telecommunications services leased from SaskTel;

“*Sharing Group*” refers to a group of persons engaged in sharing; (see – for the purposes of this definition under “reseller” above)

“*User*” refers to a person or a member of a sharing group using a telecommunications service or facility for the person’s or member’s private communications needs.

ITEM 80 Resale and Sharing - *Continued***ITEM 80.2 Conditions of Service**

1. SaskTel's telecommunications services may be shared or resold in accordance with the conditions in this Tariff. However, the resale of residential exchange services is only permitted to provide residential services.
2. Resellers and sharing groups are required to register with SaskTel and the Commission prior to receiving service, except those who provide only SaskTel's switched local exchange and/or switched toll services to persons physically located in or on the reseller's or sharing group's business premises.
3. The provision of public pay telephone service by resellers and sharing groups is not permitted.
4. Where a reseller offers shared tenant services, it must provide SaskTel with direct access, under reasonable terms and conditions, to tenants who choose to receive service from SaskTel rather than, or in addition to, service from the reseller.
5. Resellers who resell Centrex service must make all reasonable efforts to ensure that the end-user does not employ the service to transmit unsolicited Automatic Dialing-Announcing Devices (ADAD), live voice or facsimile calls for the purpose of solicitation (refer to SaskTel's tariff item on Restrictions on the Use of Automatic Dialing-Announcing Devices (ADAD) and Conditions for Unsolicited Live Voice and Facsimile Calls for the Purpose of Solicitation).
6. The provision of a non-forborne telecommunication service by the Company to an affiliate which the affiliate resells to provide telecommunications services to the public is conditional on the Company obtaining prior Commission approval of a tariff which specifies the rates, terms and conditions under which the relevant telecommunications services are provided by the affiliate to the public. Those rates, terms and conditions must be identical to the rates, terms and conditions which would apply if the telecommunications services in question were provided to the public by the Company instead of by the affiliate. If the Commission has forborne from regulating the telecommunications services in question when provided by the Company, then the above condition does not apply.

M

M - Moved from page 78

ITEM 80 Resale and Sharing - Continued**ITEM 80.2 Conditions of Service – Continued**

7. Resellers must provide SaskTel with complete name, address and telephone number information for each of the Reseller's end customers. Resellers must provide any changes to end customer information to SaskTel within thirty (30) days of the change.
- 8.a) Resellers must make available to the end user the following information, within a reasonable period of time, in Braille, large print or computer diskette or such other format as is mutually agreed upon between the reseller and the end user:
- (i) upon request of end users who have visual disabilities (i.e. blind):
 - billing statements;
 - bill inserts sent to subscribers about new services or changes in rates for existing services;
 - any bill inserts that are mandated from time to time by the Commission; and
 - any customer notification regarding limitations that may exist with respect to 911/E911 or privacy safeguards;
 - (ii) upon request of end users or potential end users who have visual disabilities (i.e. blind), information setting out the rates, terms and conditions of the service.
- 8.b) In the case of a request for an excessively large volume of information, the Reseller may limit the alternative format to computer diskette or any other electronic format mutually agreed upon by the parties.
9. Where a local Voice over Internet Protocol (VoIP) service provider is not a Canadian carrier subject to the CRTC's emergency service obligations for local VoIP service provider and SaskTel's telecommunication services are to be used by the local VoIP service provider for the provision of local VoIP services, then, as a condition of SaskTel providing their telecommunications services, the local VoIP services provider must register with the Commission as a Reseller and abide by the directives of the CRTC set out in:
- (a) paragraphs 52, 68, 93, 94 and 98 of Telecom Decision CRTC 2005-21, *Emergency service obligations for local VoIP service providers*;
 - (b) Telecom Decision CRTC 2005-61, *Follow-up to Emergency service obligations for local VoIP service providers, Decision 2005-21 – Customer notification requirements*; and
 - (c) Telecom Decision CRTC 2007-44, *Routing of fixed/non-native and nomadic VoIP 9-1-1 calls to public safety answering point*.

ITEM 80 Resale and Sharing - Continued**ITEM 80.2 Conditions of Service – Continued**

9. As a condition of service under this tariff, and in accordance with paragraphs 50, 66 and 104 of Telecom Regulatory Policy CRTC 2009-657, *Review of the Internet traffic management practices of Internet service providers* (TRP 2009-657), customers employing Internet Traffic Management Practices (ITMPs) shall:
 - a) Whether or not they are Canadian carriers, abide by the requirements of subsection 27(2) of the Telecommunications Act with regard to any ITMPs they employ;
 - b) Abide by the disclosure requirements described in TRP 2009-657; and
 - c) Not use for other purposes personal information collected for the purposes of traffic management or disclose such information.

10. As a condition of service under this tariff, and in accordance with paragraph 14 of Telecom Regulatory Policy CRTC 2011-46, *Review of the Commissioner for Complaints for Telecommunications Services* (TRP 2011-46), the reseller is required to be a member of the CCTS.

N
|
|
|**ITEM 80.3 Rates**

Resellers and Sharing Groups shall pay to SaskTel the rates and charges for each item SaskTel is required to provide to enable the Resale and Sharing of services, such rates being in addition to other rates, charges, terms and conditions of service that may be applicable, as follows:

1. Interconnecting Charges
 - (a) SaskTel will furnish interconnecting circuits with line side access to resellers and sharing groups at rates and charges specified in SaskTel's Tariffs.
 - (b) SaskTel will furnish interconnecting circuits with trunk-side access to resellers under the terms, conditions, rates and charges specified in SaskTel's Competitor Access Tariff. The particular requirements specified in Interconnecting Circuits for Trunk Side Access; Operator Services; Billing & Collections Services; Network Announcements for Subscribers of Disconnected Interexchange Carriers with Trunk Side Access; and Bulk Transfer of a Customer Base Between IXC's having Feature Group D Service, also apply.

ITEM 80 Resale and Sharing - Continued**ITEM 80.3 Rates – Continued****1. Interconnecting Charges – Continued**

- (c) SaskTel will provide Billing and Collection Service to resellers with interconnecting circuits with trunk-side access under the terms, conditions, rates and charges specified in SaskTel's Competitor Access Tariff item, Billing and Collections Service, including execution of the Billing and Collection Services Agreement. M
|
|
|
|
- (d) By utilizing Billing and Collection Service, the reseller agrees that all information provided to the reseller pursuant to 1(c) above is provided in confidence for the exclusive use of the reseller. The reseller is responsible for protecting the confidentiality of the information and may not provide, disclose or resell this information to any third party, including but without restricting the generality of the foregoing, any agents, affiliates, related persons, co-venturers, etc.
- (e) By utilizing Billing and Collection Service, the reseller agrees that all information provided to the reseller pursuant to 1(c) above may only be used for the purpose of billing eligible calls as defined in the Billing and Collection Service Agreement specified in SaskTel's Competitor Access Tariff, Billing and Collections Service. Without restricting the generality of the foregoing, the reseller may not use any information provided pursuant to 1(c) above for telemarketing purposes. For the purposes of 1(c) above, telemarketing shall include but not be restricted to the promotion, by the reseller or by any person or entity, of the reseller or its services or products, or of any third party or its services or products, by any means.
- (f) Resellers with interconnecting circuits with trunk-side access using CCS7 signaling and which provide Operator Services may query the Billed Number Screening (BNS) database, offered by Bell Canada on behalf of all applicable ILEC territories via designated gateway STPs.
- (g) Resellers which query the BNS database, by querying the database, agree that all information provided to the reseller pursuant to 1(d) above is provided in confidence for the exclusive use of the reseller. The reseller is responsible for protecting the confidentiality of the information and may not provide, disclose or resell this information to any third party, including, but without restricting the generality of the foregoing, any agents, affiliates, related persons, co-venturers, etc.

ITEM 80 Resale and Sharing - ContinuedD
F**ITEM 80.4 Standby Circuits**

m

1. Standby circuits are available to resellers under the terms, conditions, rates and charges specified in SaskTel's Competitor Access Tariff item, Standby Circuits.

ITEM 80.5 Internet Service Providers

M

1. The following definitions apply to this section:

“*Internet Access Line (IAL)*” refers to an access service provided by a Local Exchange Carrier (LEC) to an ISP which allows calls to be originated from or terminated to the Public Switched Telephone Network (PSTN). IAL’s typically connect to a “gateway” or server which provides the functionality to connect a caller to the Internet.

“*Internet Service Provider (ISP)*” refers to a service provider who provides dial access capability to connect customers to the Internet via an Internet gateway or server.

“*IP Data*” traffic includes all usage on the Internet except for PSTN Voice traffic and PC Voice traffic.

“*PC Voice*” refers to real-time voice communication via the Internet using a personal computer or other terminal equipment which is equipped with a modem, and the hardware and software required to perform voice compression and conversion to a form which can be transmitted to or from an ISP over Internet Access Lines (IAL). At the IAL, PC Voice communication is effectively indistinguishable from other forms of communication between a modem-equipped personal computer and an ISP.
